

# Your Original Tank-Mix Partner: ZeroTol® 2.0

Add to every spray for improved disease control

- 1 Disease Reset Button**  
On-contact activity resets the disease clock, reducing pathogen inoculum and pressure immediately
- 2 Enhances Efficacy of Systemic Chemistries**  
Allows focused activity of systemic or translaminar chemistries
- 3 Preserves Fungicide Performance**  
ZeroTol 2.0 helps prolong the life of standard chemistries and improves resistance management
- 4 Cost-Effective Application Rates**  
Rate ranges for every problem, every program, and every budget

**ON-CONTACT  
ACTIVITY  
SINCE '98**

## Rates Explained

**1:100** 128 fl. oz./100 gallons **PRESSURE High**

Standalone applications only

**1:300** 43 fl. oz./100 gallons **PRESSURE Med**

Warmer months and sensitive crops

**1:500** 26 fl. oz./100 gallons **PRESSURE Low**

Proactive, low disease pressure months

Apply weekly at low rates, consistent use at 1:300 or 1:500 is more effective than intermittent and high-rate applications.

**Do not** mix with metal-based chemistries.
