This compatibility addendum is only intended for use with OxiDate 5.0. Contact your BioSafe Systems technical representative for more detailed tank-mix instructions and to learn more about product interactions prior to mixing and applying tank-mix solutions. Consult the BioSafe Systems' OxiDate 5.0 Compatibility Guide prior to tank-mixing with commonly used pesticides. Always read and follow labels instructions. Jar tests should be conducted when combining products to ensure compatibility before tank-mixing. All products, including tank-mixes, should be tested for phytotoxicity before widespread use. A2606.2
